Research Guide written by Katie Kubesh

Activities written by Niki McNeil

Graphics and Editing by Kimm Bellotto

In the Hands of a Child gives permission for one copy of all written material to be copied and or printed. Reproducible graphics may be copied as many times as needed.

From the time we first began using Project Packs we fell in love with them. We knew that this type of hands-on learning experience was just the thing that was needed to make boring academics not only educational but, fun and exciting too!

To help get you started we have included some of the questions we receive about Project Packs.

What is a Project Pack?

A Project Pack is simply a great way of compiling key points from your studies into one spot that can easily be stored and available to be reviewed at any time

How does this help me? and Why is this a better way for learning?

The number one reason is the students will retain the information covered so much faster. Children learn by doing. Project Packs put learning into their hands!

Another reason is it is a convenient way to store those wonderful projects. Students can go back and review them at any time and your schoolroom or refrigerator is not cluttered with bits and pieces of their projects.

And the final reason is they are great and the possibilities are endless! There are no age limits and no subject lines that cannot be worked into a Project Pack. We will be adding many units to help you in the education of your students.

How do I make a Project Pack?

A Project Pack is simply a file folder refolded into a shutter style book. Open it flat and then fold the sides into the middle creasing neatly and there you have it.

For a more colorful and eye-appealing Project Pack it is suggested that some of your Reproducibles be printed out on colored multi-purpose paper.

What supplies do I need?

You will want to have file folders, paper of different colors and weights, your students' favorite coloring tools, tape, glue, scissors, and a stapler.

Adapting a Project Pack to Fit the Needs of Your Student

Adapting a Project or Research Pack is key to ensuring that you provide the best lesson for your student. At first glance, some might just skip over an activity because they feel it is too easy or too difficult for their student. We want you to use all the activities we provide...they are easily adaptable!

For example, if you have a PK-3 student the vocabulary activities might be difficult for him or her to complete. Here are some tips to help you adapt the activities that require your student to write:

1. Have your student dictate vocabulary words and their meanings as you write them.
2. Have your child draw a picture instead of writing.
3. You write the word or sentence first so your student can see how it is written.
4. Practice. Practice. Practice. In the car, on a walk, in the shopping cart! Practice saying the vocabulary words and what they mean. Before you know it your preschooler will be telling others what those words mean!
5. Contact us. We would be happy to give you ideas for adapting specific units to a grade level.

On the other hand, some of the activities may seem too easy for your student. Does your 5th grade level student want to learn about butterflies, but the Project Pack seems too easy? Try it anyway; just change things up a bit to suit that grade level. Here are some tips to help you adapt the activities to make them a little more difficult.

1. In addition to writing down vocabulary words and their meanings, ask your student to use the word in a sentence; either verbally or written.
2. Give your student 1 hour (or other reasonable time frame) to research the topic on their own; either online or at the library. Give your student a set of questions or see what he/she can find without your guidance.
3. Encourage your student to expand on the topic or choose a related topic to learn about.
4. Take a look at some of our preschool units...there is lots of clipart related to each topic. Have your older student cut these out and write a story or play about the pictures or perform a play.
5. Contact us. We would be happy to give you ideas for adapting specific units to a grade level.

These are just a few ways you can adapt a Project Pack to meet the needs of your student. Let your student be the judge if something is too easy or too difficult...you just might be surprised!

Awards

The National Arbor Day Federation awards prizes to different people and groups who are leaders in tree planting and conservation.

Awards given out include:

- J. Sterling Morton Award
- Caroline French Morton Award
- Good Steward Award
- Lady Bird Johnson Award
- Project Award
- Education Award
- Celebration Award
- Promise to Earth Award

Arbor Day Around the World

Arbor Day is celebrated in countries around the world. It is called Arbour Day in Australia, Canada, New Zealand, and the United Kingdom. Japan calls the celebration Greenery Day. In other countries, it is called Tree Holiday or Tree

Festival.

Celebrations and holiday dates vary from country to country.

- In Israel, Tu B'Shebat is celebrated. This is the 15th day of the Hebrew month Shebat, which is also called the New Year for Trees. In Ancient Israel, Hebrews celebrated by planting trees for children born during the year. A cedar tree was planted for each boy born and a cypress tree was planted for each girl.
- In Brazil, Dia dos Arvores is celebrated at the beginning of spring on September 21.
- Bulgaria celebrates National Forest Day during the first week of April.
- Germany celebrates Tag des Baumes on April 24.
- Holland celebrates the Dutch National Tree Festival in March (March 22, 2006 was the 50th Annual Dutch National Tree Festival).
- In India, the National Festival of Tree Planting is celebrated.
- The Japanese celebrate Midori Noni, Greenery Day or Greening Week, in late April.
- In Spain, Fiesta del Arbol, which means Tree Festival, is celebrated on March 26 to **commemorate** the day when King Alfonso planted a pine tree near Madrid in 1895.
- In the United Kingdom, National Tree Week, organized by the Tree Council, is celebrated at the beginning of November. National Tree Dressing Day, organized by Common Ground Trees, is celebrated the first weekend of December.

Arbor Lodge State Historical Park and Arboretum

The Arbor Lodge State Historical Park and Arboretum is located in Nebraska City, Nebraska. The park is located on 72 acres of land and includes the mansion of J. Sterling Morton. The mansion is now a museum with many items dating back to the early history of Nebraska.

J. Sterling Morton not only founded Arbor Day, he also planted many trees! He imported trees from all over the world and his house has over 270 different varieties of trees and shrubs including apple orchards, chestnuts, pines, and 10 state-champion trees.

Instructions to Re-fold a Folder

Normal Fold:

Open folder flat

Fold both the right and left edge to the center crease creating a shutter
Cut a folder in half OR use a piece of cardstock to form your extension
Lay the extension in the center of the shutter fold folder
Attach at the top end using clear packing tape

Double Folder:

Open folder flat

Fold both the right and left edge in toward the center crease creating a shutter

Do this again with a second folder

Set both folders side by side with their shutters opened (pointing straight up not flat)

In the center where the two folders meet glue the outer flaps of each shutter together connecting the two folders

Fold both shutters closed and flip over and close

The back of one of the folders becomes your cover

***You can add extensions to a double folder using the same method as for a single folder.
